Brief description of records

This series consists of 113 reels of silver halide archival original microfilm produced during the course of the Human Radiation Experiment Records Retrieval Project, July to April, 1994-1995. They were originally created and maintained (as an archival backup copy) by the FileTrac Corporation, located in Hayward California. The FileTrac Corporation did the microfilming for various documents relating to human radiation experiments which were located by the LBNL Archives and Records Office Human Radiation Experiment Records Search Team. This set of microfilm was sent by FileTrac to The Bancroft Library at the University of California Berkeley, after FileTrac was acquired by ImageMax. The microfilm was transferred to the Archives and Records Office by David Farrell, Associate University Archivist at The Bancroft (email: dfarrell@library.berkeley.edu; phone: 510-643-9498/3781). The majority of the microfilm was copied from the following Bancroft manuscript collections: Ernest O. Lawrence Papers (79 reels), John Hundale Lawrence Papers (12 reels), Drawing (from the Ernest O. Lawrence Papers--1 reel), Joseph G. Hamilton Collection (1 reel), Kenneth Gordon Scott Papers (1 reel), and Robert S. Stone Papers (1 reel). In addition this accession contains microfilm of LBNL records--Dr. Joseph G. Hamilton Records (17 reels), LBL Human Radiation Experiment Records (1 reel). While microfilm in this accession may duplicate the content of the above related accessions, the fact that this microfilm is the silver halide archival backup copy, it should be retained permanently.
