Brief description of records

This accession is comprised of photographs, press releases, conceptual design reports, clippings, reprints, and photocopies. The materials document Public Affairs' (previously Public Information's) functions and responsibilities in communicating experimental research, awards and honors, training programs and significant personnel changes at LBNL (previously LBL and LRL). Individuals documented include but are not limited to Hal Anger, Luis Alvarez, Gerson Goldhaber, E.O. Lawrence, Edward Lofgren, Edwin McMillan, J.R. Oppenheimer, Glenn Seaborg, George Smoot, Emilio Segre, Edward Teller, and Clyde Wiegand. Subjects include but are not limited to accelerators, cyclotrons (27", 37", 88"), Bevatron, bubble chambers, Donner Lab, and radioisotopes. These files provide a wealth of background materials on notable individuals, research, and facilities for the time period 1948-2009.

The original order and content has been preserved. Once transferred to the National Archives limited weeding of duplicative material would be appropriate. Also after transfer to NARA, the collection should be reviewed for conservation steps, especially as regards the clippings in the files.
