Human Radiation Experiments Search and Retrieval Project Photocopies of Significant Documents

Inclusive Date of Records

1935 1989

No of Containers

13 FRC Box

Brief description of records

These records are the photocopies of documents related to the Human Radiation Records Retrieval Project at Lawrence Berkeley Laboratory (LBL). They document the development of experiments using isotopes for the purposes of diagnosis, therapy, research on somatic effects, and uptake by the human body from 1935 to the early 1980's. Documents are variously kept by subject, by provenance order, and by date & include the following: LBL photocopies, University of California Archives, Bancroft Manuscripts Collection (UCB), UC Office of the President Regents Minutes, UC San Francisco Special Collections, Hoover Institute (Stanford), LBL Public Information Office materials, University of Washington, University of California, Los Angeles, and 47 of the top "Hot Documents" chosen by the team for posting on the Internet. The HRE Team retrieved and reviewed the record in boxes 1 through 9, and the ARO Staff retrieved and reviewed the records in box 10 prior to the establishment of the HRE Team.

Materials

Textual

Records Retention

- Historically Valuable Documents. Do not destroy. A detailed folder listing is included with the Records Transmittal
- Destroy/Review on a scheduled basis with a minimum retention of _____ years. Disposal/Review Date: Perm.

This is in accordance with:

- The National Archive General Retention Schedule. Citation _____ Proposed Sch. (July 5th, 1991) Sch. 19, Item 1. (1)
- The Department of Energy Retention Schedule. Citation _____

Disposal Authorization:

The legal retention of the records listed on this Records Transmittal has elapsed. Since I forsee no use of these records, I authorize their disposal.
